## 2 Day Lean Strategy Alignment & Planning

### Setting the direction for the Lean Journey and creating a Lean Business System

This 2 Day Leadership Training will help you create high level Leadership engagement, alignment and develop a roadmap for your Lean Transformation journey using our Transformational evolution 'Learner to World Class' matrix and developing a Lean Vision and Strategy.

*Discussing current business performance*

*Classroom Leadership Training with Execs*

- + We can start to help you clarify and understand where you are now, where you want to be and help create a plan to get there for your Lean journey.
- + Ensure the right foundations and building blocks are put in place using our 'Learner to World Class' maturity assessment to help create a Lean Business System
- + The outcome of this training also helps Senior Leaders better understand their role in supporting Lean and develop their thinking on creating and driving change.
- + Highlight the importance of creating and deploying a clear Vision, Strategy and goals through Visual Management and then supporting everyone to meet these goals.

## Key Learning Outcomes:

- Lean Training to understand the total Lean Business System model and framework
- Why Lean fails and various change management frameworks to avoid it
- The roadmap, blueprint and journey steps towards sustainable Continuous improvement
- The key elements of cultural change and leadership behaviours to support Lean
- A baseline of where your business is, a target condition 5 years and a yearly breakdown to get to the target using a maturity framework self assessment tool.
- An agreed leadership direction, alignment and engagement of the target state.

**This 2 day Leadership training is absolutely essential to engage and align the management team and set a course for the journey. This is the foundational planning and learning required before any journey...**

## Learner to Master Coach Journey

The Lean Strategy Planning & Alignment Workshop is a real foundational building block to a Lean journey. It is a Senior level Leadership activity to set direction and plan a journey for a specific purpose.

To move through to Master Lean Coach level it is expected that Leaders and coaches could run these workshops with a level of coaching and support and eventually on their own.

***The Business diagnostic process provides a snapshot of the business in all areas required to be understood for a strategic Lean transformation. Leadership, Culture, Organisation structures, Processes, People, Quality, Performance and Results.***

## Coach / Facilitator for the Leadership Planning Workshop

### Andy Goddard - Lead Consultant

Andy is an experienced Lean black belt with 20 years experience in strategic Lean transformation. Andy also has considerable experience in implementation with a practical hands on approach learnt from many different industries and companies around the world.
