3 to 5 Lean Kaizen Improvement Event Hands on Problem Solving & Rapid Improvement

A Lean / kaizen event is an active 'hands on' team based, focussed and accelerated application of Lean principles and tools to solve business problems and take action on identified waste / variation. The aim is to improve processes and performance in Safety, Quality, Cost, Delivery and People, as well as adding more value to the Customer.

Team Practical Problem Solving

Team reviewing improvement ideas (Gemba)

+ The event is focussed on preparing people for change, breaking paradigms, challenging the status quo, developing lean knowledge and engaging / empowering people to take ownership of their business to solve problems.

+ The event targets improvements to deliver increased efficiency and productivity, lead-time reduction, floor space, Inventory and many other profit and performance related measures as well as cultural change.

+ It is a multi functional team approach, working together to make changes and deliver a new improved process using a Plan Do Check Act (PDCA) approach. It involves the people side of Lean; creating, growing and building a team with enthusiasm and passion for improvement to make step changes in performance and demonstrating the power of having a purpose / goal with support from leadership to sustain.

** Bookings can be made for minimum 10, maximum 14 people per event.*

Comments

"...Following our Lean diagnostic, this was a next logical step to accelerate the improvements and this event was a real shot in the arm"

"...We set goals, knew what to target and we made changes there and then. It was such a great team effort ...brilliant result."

The Lean / kaizen event is not the end, in fact it is just the start to gain some inertia and engage the people in a particular area of the business in the process of continuous improvement.

The outcome of the event delivers some changes during the week but more importantly develops a longer term plan of changes and improvements to implement that will help 'sustain the gains' and creates a number of foundational tools, methods and enablers to support improvement on a continuous basis going forward.

The Lean Event is often best following a Lean Diagnostic based on having a strategy to improve part of a bigger process, but can stand alone.

Learner to Master Coach Journey

The Lean Event helps participants reach a new level of understanding of Lean through this process. It is a 'Learn by Doing' approach and would go towards building further competency towards a Master Lean Coach recognition.

To move through to Master Lean Coach level it is expected that Leaders and coaches could run these events with a level of coaching and support and eventually on their own.

Lean events provide clients with an immediate ROI due to the implementation of Quick wins and total business process reconfiguration through PDCA.

Coach / Facilitator for the Lean Diagnostic Workshop

Andy Goddard - Lead Consultant

Andy is an experienced Lean black belt with 20 years experience in strategic Lean transformation. Andy also has considerable experience in implementation with a practical hands on approach learnt from many different industries and companies around the world.
