## Lean Business Assessment

**Holistic Business diagnostic to benchmark and know where you are at a high level**

Our Business Assessment will help you create a high level understanding of your business and baseline your current status and capabilities using some industry standard benchmarking tools...

The Lean Business Assessment takes a helicopter view of your Business, to baseline your current status and capabilities in a number of different categories. We utilise some industry standard benchmarking tools to review your business and opportunities for improvement.

We do this to help understand the total business, but also because this criteria is foundational for creating sustainable profitable growth, and are parts of the jigsaw to understand you and your business situation.

Our independent, unbiased view and perspective, looks at your business as a holistic entity and with a different set of eyes. We ask the right questions and questions you may not have asked before, as well as challenge you, walk the business, speak to people, and actively understand some of the problems from different levels of the business, and Customers views.

*This Business level assessment provides a snapshot of the business in all areas such as. Leadership, Culture, Organisation structures, Processes, People, Quality, Performance and Results.*

### Key Learning Outcomes:

- A written document that assesses where you are on the benchmarking tool as well as a thorough list of observations, strengths, weaknesses and opportunities for improvement and next level analysis steps.

*Please visit our website to register your interest and to download the booking form.*

### Comments

*"...The Business assessment gave us some real insights into where we had gaps for improvement and helped us realise we were on the journey but way of course"*

*"...The Business assessment helped us recognise we didn't really have all the pieces in place for our journey and needed to work on our plan which Andy helped us develop"*
