

Lean Leadership Coach Introduction

Lean Leadership Coach is a leading business improvement training, consulting and high performance coaching practice, specialising in lean, leadership, six sigma, kaizen, and employee engagement for business transformation.

With over 20 years' experience working in many diverse companies at both strategic and operational levels, we bring a passion for improvement and a different perspective to your business. We help develop leaders, coaches and front line teams to 'see differently', challenge the status quo and build an 'improvement system' for better performance and competitive advantage.

With a wide range of services to offer, we work with you to develop the right solutions for your business depending on the situation, problem or outcome required. We can provide training, facilitate diagnostic workshops, kaizen events, improvement projects, coach teams through PDCA problem solving and experimentation, or simply support, mentor and guide you to become a better leader of change and improvement.

Depending on your needs, we help identify customer value, deploy business goals to see gaps in performance, streamline key business processes and support change by involving, engaging and challenging teams to achieve goals utilising their innovative ideas and know how.

We also help leaders understand and establish the 'key enablers' to building a 'lean management system' for highlighting problems and making hidden waste visible. Leaders with knowledge of the lean thinking, principles, tools, and supportive behaviours are a powerful recipe for engaging their teams to leverage performance and we help you to evolve and grow this capability over the long term.

In a nutshell, we aim to make things better, easier and simpler for your business, your employees and your customers. We focus on improving Safety, Quality, Cost, Delivery and People through our overarching model of **CUSTOMERS, PURPOSE, PROCESSES, PEOPLE, PERFORMANCE & RESULTS**.
